SUMMARY

Backend engineer with 5+ years building high-throughput distributed systems using Node.js, Go, and AWS, with prior experience in full-stack (React, React Native). Scaled Razorpay billing from 100K → 1.5M+ daily transactions using async architectures. Currently working with Emirates NBD (via Synechron) on banking-grade microservices.

SKILLS

Languages: Go, Node.js, TypeScript, Python
Frameworks: NestJS, Express
Frontend: React, React Native
Cloud & Containers: AWS, GCP, Docker, AWS CDK
Messaging: Kafka, RabbitMQ, SNS/SQS
Databases: MongoDB, MySQL, DynamoDB, Redis
Observability: ELK Stack
Architecture: Microservices, Event-Driven, Serverless

EDUCATION

B.Tech, Computer Science
Aryabhatta Knowledge University (2016 – 2020)

EXPERIENCE

Synechron Technologies — Sr. Associate (Backend Engineer)

Nov 2025 – Present | Bengaluru, India (Client: Emirates NBD, Dubai)

- Building Node.js microservices deployed on OpenShift (OCP) + Docker for banking workloads.
- Designed ELK-based observability pipelines for centralized logging, monitoring, and alerting.
- Integrated Kafka for event-driven communication, improving system resilience and decoupling.
- Collaborating with ENBD teams on CI/CD, container lifecycle, and platform standards.

Razorpay — Product Development Engineer II

Jan 2024 – Nov 2025 | Bengaluru

- Led Node.js → Go migration, improving throughput by 45% and cutting latency by 30%.
- Built distributed async pipelines (SNS/SQS/S3) handling 1.5M+ events/day.
- Executed zero-downtime MongoDB → MySQL migration.
- Mentored engineers and drove design reviews across microservices.

Ethereal Covenant — Software Development Engineer

May 2023 – Dec 2023

- Developed full-stack apps using React Native, Node.js, MongoDB, and AWS.
- Contributed to UI components and frontend integration alongside backend services.
- Improved response time ~25% via caching and query optimization.

Altsys — Senior Software Engineer

Aug 2022 – Sept 2023 | Bengaluru

- Owned backend services using Node.js, PostgreSQL, MongoDB and supported frontend integrations.
- Introduced caching + CI/CD pipelines, improving reliability and latency.

Deqode — Solutions Engineer

Nov 2021 – Aug 2022 | Pune

- Built microservices using Node.js, RabbitMQ, MongoDB.
- Migrated legacy systems to event-driven architecture (NestJS).

CodeBucket Solutions — Full Stack Developer

Dec 2020 – Nov 2021 | Kochi

- Built full-stack applications using React, Node.js, MySQL, NGINX.
- Developed real-time systems using Socket.io, Firebase, and Redis.
- Delivered production-ready UI and backend systems.
