SUMMARY

Senior Full Stack Engineer with 5+ years of experience building scalable **React** and **Node.js** applications backed by **AWS** cloud infrastructure. Experienced across full-stack development, distributed backend systems, REST APIs, **microservices**, and cloud-native architectures. Recently focused on backend platforms handling millions of daily transactions while continuing to collaborate on frontend integrations and end-to-end product delivery. Actively use AI-assisted development tools (**Claude Code**, **GitHub Copilot**, **Opencode**) to accelerate development and improve code quality.

SKILLS

Languages: TypeScript, Go, Python

Frameworks & Runtimes: Node.js, NestJS, Express, Gin

Frontend: React, React Native, Tailwind, Shadcn, TanStack Query

Cloud & Containers: AWS, GCP, Docker, Nginx, Caddy, AWS CDK

Messaging: Kafka, RabbitMQ, SNS/SQS

Databases: MongoDB, MySQL, DynamoDB, Redis

Observability: ELK Stack, Grafana

AI Tools: Claude Code, GitHub Copilot, Opencode

Architecture: Microservices, Event-Driven, Serverless

EXPERIENCE

Synechron Technologies — Sr. Associate

Nov 2025 – Present | Bengaluru, India (Client: Emirates NBD, Dubai)

- Collaborated with frontend and product teams to design secure banking services consumed by web application for banking workloads.
- Built and maintained React-based UI components for internal banking dashboards, working closely with UX designers.
- Designed **ELK**-based observability pipelines for centralized logging, monitoring, and alerting.
- Integrated **Kafka** for event-driven communication, improving system resilience and decoupling.
- Collaborating with ENBD teams on CI/CD, container lifecycle, and platform standards.
- Serve in a rotational on-call capacity, handling production incident response and troubleshooting across banking services.

Razorpay — Product Development Engineer II

Jan 2024 – Nov 2025 | Bengaluru

- Led **Node.js** → **Go** migration, improving throughput by 45% and cutting latency by 30%.
- Partnered with frontend engineers to design and evolve APIs supporting customer-facing billing experiences.
- Built distributed async pipelines (**SNS/SQS/S3**) handling 1.5M+ events/day.
- Executed zero-downtime **MongoDB** → **MySQL** migration.
- Mentored engineers and drove design reviews across **microservices**.
- Participated in on-call rotations, incident response, root cause analysis, and aligned team members on production issues.

Ethereal Covenant — Software Development Engineer

May 2023 – Dec 2023

- Developed customer-facing **React Native** applications integrated with **Node.js** REST APIs.
- Built reusable UI components and collaborated on frontend architecture and feature implementation.
- Worked across frontend and backend to deliver end-to-end product features.
- Improved response time ~25% via caching and query optimization.

PROJECTS

ApiHealthz.com — API uptime monitoring & alerting platform

Built end-to-end: **React** + Vite frontend, **Node.js** REST APIs on **AWS** Lambda, and **MongoDB** for storage.

Integrated WhatsApp and Slack alerts for real-time incident notifications to subscribers.

Provisioned infrastructure using **AWS CDK** for repeatable, infrastructure-as-code deployments.

EDUCATION

B.Tech, Computer Science
Aryabhatta Knowledge University
(2016 – 2020)

Altsys — Senior Software Engineer

Aug 2022 – Sept 2023 | Bengaluru

- Owned backend services using **Node.js**, PostgreSQL, **MongoDB** and supported frontend integrations.
- Introduced caching + CI/CD pipelines, improving reliability and latency.

Deqode — Solutions Engineer

Nov 2021 – Aug 2022 | Pune

- Built **microservices** using **Node.js**, **RabbitMQ**, **MongoDB**.
- Migrated legacy systems to event-driven architecture (**NestJS**).

CodeBucket Solutions — Full Stack Developer

Dec 2020 – Nov 2021 | Kochi

- Built full-stack applications using **React**, **Node.js**, **MySQL**, **NGINX**.
- Developed real-time systems using Socket.io, Firebase, and **Redis**.
- Delivered production-ready UI and backend systems.
